Fishbutter ¹

Merci.GD

on the road for harmony

a.l.m.a.

© 2009 Hg Schramm

¹ Fishbutter: Ultra-short synopsis. Derived from the German saying „Now, let’s add butter to the fish“. It means: Let’s bring the case to the point, straightly, clearly and simply.

The chinese signs are yú (fish) and huángyóu (butter). This doesn’t make sense neither in Chinese. Except (for instance) a Chinese person speaks German and knows a person from (for instance) Hamburg.

² 108.000 Li is the distance the famous Monkey King [Sun Wukong](#) is able to jump in one cloud-somersault. See: [Journey to the West](#). The three signs below signify “journey east”, referring to this classic Chinese novel, that in our days becomes popular as well in the western world: See “[The forbidden kingdom](#)” with Jackie Chan and Jet Li, or “[Monkey – Journey to the West](#)” by Demon Albarn, Jamie Hewlett and Chen Shi-Zheng.

A cab-drive from Hamburg to Shanghai. A German driver learning Chinese on the way from his passenger.

Between documentary, big brother, sitcom and educational TV a throughout German-Chinese Roadmovie occurs.

The journey is the reward: The new Silkroad.

Merci.GD

on the road for harmony

Cruisemap

Possible schedule for a mission over new year 2008/09

1. What_?

Merci.GD is a mobile miniature media production.

Distinctive features:

1. Minimal costs and manpower produce a surprising variety of valuable, authentic content by optimizing workflow and schedules.
2. That means alongside: **Produce a revolutionary high ROI³ for all stakeholders.**
3. Merci.GD concentrates on the small, the special, the personal facts and matters. That „fits inside the camera“, also under semi-pro circumstances. And the final broadcasts can always be supplemented by professional footage that usually exist of well-known sights anyway.

1.1. The product

Docu-Roadmovietainment. Intercultural. Brand-suspicious. Suitable for cell-phones.

These formats, for example, could be produced and merchandised more or less in realtime (interaction, live-feeling – associated media: Web 2.0, IPTV, TV, mobile TV, radio, print)

<u>working title</u>	<u>format</u>	<u>freq.</u>	<u>dur.</u>	<u>target groups</u>
Chinese on tour	language class	daily	1 – 5 min	youth, educated
At the Roadside	report	daily	variating	broad (gossip)
Merci Milestones	report	50	variabel	breit (3. Programme)
Philosophical Moment	talk	daily	1 – 5 Min	youth
Historical mile	docutainment	casual	variabel	youth (Galileo)
Daily Joke (german/chin.)	comedy	daily	1 – 5 Min	broad
Taxi-Story	interact. soap	daily	1 – 5 Min	comedy (art-house)
Merci – life on board	sitcom	daily	Miniaturen	broad (big brother)
Musical Discoveries - traditional - contemporary	report	casual	3 – 5 Min	educated also: youth, industrie
Gastro-Spy - service areas, fast food - restaurants - recepies/kitchens	report	daily	1 – 10 Min	also: travel industrie..
Hotel-Quicktest	report	50 – 69		also: travel industrie..
Fuel-Guide	report	daily?		Logistic industry...?
Borders	report	ca. 14	1 – 5 Min.	educated
Merci Meets	interview	casual	3 – 8 Min.	braod
Fairy Tale Mile	reading	optional	2 – 7 Min.	kids
quiz, games		optional		due to request
sports/soccer	report	optional		broad

³ ROI: Return On Invest. The (mostly financial) advantage taken from invested means (mostly money). The writer of these lines belongs to the group of people that are in urgent need of money, the more the better. Still he dreams and hopes that Merci.GD apart from that will produce an ideational ROI or profit more than everything else. The very different cultural dispositions of Chinese and Europeans are being reflected vice versa in a humorous way in order to rise bilateral understanding and lower the fear of the foreign without leveling the differences: **On the road for harmony.**

Moreover, the writer hopes (in the sense of an abstract ROI) to be able to collect experiences and contacts in order to be able to perform the One-Monkey-Show **Mach Äffchen – Aufstand im Himmel**, a German play which is contemporarily not performable (www.mach-aeffchen.de)

Additionally / alternatively:

Works on request, ordered by industry (travel, market research, ...) or press: Stills, footage, interviews, researches...

Possible: Road-Side-Events

For example a concert presenting **Die Winterreise**⁴ by Schubert, in case a piano and player can be found on the way. For example in Dunhuang, during Chinese New Year (day 42-44). Otherwise it might be nice to sing Schubert on the road. But maybe some old Sinatra or sailor's songs will do better behind the wheel?

Or the event "**Merci Afrique!**" that is not as absurd as it looks like at first view and didn't happen to be⁵ during the experimental journeys of Merci.GD during summer 08. For instance at halftime (day 36) in Yining or on top of the Western Sacred Mountain Hua Shan (day 40): A weather-proof heart-postcard and a magic flute are sent on journey, attached to a cluster of chocolat-condoms filled with helium, accompanied by magic, dance and music. Greetings from EU to AU (European Union to African Union in Addis Abbeba, Ethiopia). A gesture of thanks and wishes for a future in harmony and wealth. The thanks is for all the music that came into the "western" world from Africa during the last five centuries⁶: Jazz, Rock, Soul, Reggae, Musical, HipHop, Blues... this all would not exist without Africa. Good reason to say thank-you, more than once.

All in all & before all

A humorous, entertaining and culturally extremely fertile **experience of German-Chinese collaboration**.

Including the option to produce a TV- or arthouse-movie from the collected footage, that will be co-designed by german and chinese consumers (fans) from A to Z.

Quality

Today's equipment also under limited circumstances allows to produce footage of rather high quality (HDV). The lack of quality, compared to today's standarts in TV or cinema, should be compensated by originality and authenticity. For distribution on cell-phones or via webfeed the quality will probably be sufficient anyway.

Equipment should not exceed semi-professional level: Low weight and simple handling help flexibility on set. Little efforts (lightning, recording, cables..) help a relaxed atmosphere during interviews and reports. Of course compromises will have to be accepted when it comes to lightning, sound-recording and camera work. On the other hand, the step from "small but authentic" to "acceptable professional quality" is rather big: A "Taxi" will not simply replace an OB-vehicle.

The impression "my dad could have done this, too" is no a threat: Maybe dad will buy a new camera and software to produce his own family-roadmovie this summer, inspired by Merci.GD? This would be very pleasant to the Merci-crew as well (see above: "ROI").

Of course there will be a lot of tricks zooming, exposing and panning that will help "dad" (and the Merci-crew) improving. Nothing's ever perfect.

⁴ www.haggie.de/wr

⁵ The original plan was to shoot the take-off somewhere in Paris 92 (banlieue). A second try occurred at a steep mediterranean coast close to the border between France and Spain. In the first case there was not enough time to buy helium, in the second there was not enough helium on board, or the flight weight was too high. The third go will succeed. It would be nice if specialists would try to calculate a realistic route to Ethiopia (winds...). But this probably would be beyond the means of science (weather...).

⁶ Due to wikipedia the first African slaves arrived in Hispaniola in 1501. The industrially organized forced mass-resettlement of African cheap workers in European camps that lead to nowadays ethnic and cultural mix in Europe and the Americas started at the latest with the invention of the steam engine and the beginning of the „industrial revolution“ in 1769.

Merchandising

Apart from everything that can be sold with an attached logo, from cup to stringtanga: The brand-new **Eurodeck**. A poker-deck to become acquainted with Europe, also for Non-europeans. Cool advertising medium. Beautiful present: www.alma.gd/ed/ev

1.2. A story tells itself

喂!⁷

While you are reading this fishbutter you are inventing me, the story of Merci.GD. You are just in the middle of it! Please, don't be shocked. I am a very beautiful story: Colorful, thrilling, inspired and happy ending. Probably a little bit sentimental – exactly the way you like it. Whether you stop reading now or continue, whether after lecture you're going to grab your phone or keyboard to tell someone about me or not. Whether your call or mail will help my production, whether you will want to be in the credits, whether you shake your head about so much folly or wish to come on board and travel with me, if you had the time, or not:

I bursted into life during summer 2008, late in the evening of June, 19th, to be precise. I was not invented, I forced myself into your world. And by my nature I depend on the interaction of a lot of people with very different skills and interests. That's why I produce a tiny "string of action" every moment someone reads me or sees me flickering on some screen. What will happen to this (our!) tiny string is in your hands from now on. Now and forever! Isn't that positive, without any restrictions?

There's a catch here, as usually: I am in your hands. But: Not only in yours. And now it gets really tricky: It's mainly in your hands, whose hands and how many of them will become part of my action. But: Not only in yours.

Is this a lot or a little? You will find out. No matter what you're going to do now. Or don't.

Anyway: Enjoy!

Cordially and forever

Your Story

1.3. Interaction/Web 2.0: Play along!

What **km42** (SPIEGEL.de) already does, Merci.GD wants to expand to become a cult. Please check www.km42.de, digest that and this fishbutter together. And let your imagination float a little.

Merci.GD is organized very precisely and strictly, up to a certain point: Cruisemap, daily schedules and flows of production are worked out as perfectly as possible to produce as much freedom as possible during "time slots" for the shootings. Thus requests and suggestions can be answered and reacted to almost in real time. Whether these suggestions will be made mainly by industrial customers, voting webusers or gaming couch-potatoes will depend on how the story of Merci.GD will want to continue.

Suggested forms of interaction:

- route-suggestions
- votings, e.g. concerning the route or the crew (possibly without k.o.)
- influence on the plots of the staged programs: Life on board, Taxistory...
- own content (e.g. stills and videos of the visited sites, own travelogues of users..)
- co-traveling (game, raffle?)

⁷ 喂: wèi – "hello" or "hi"

2. For whom_?

Broad spectrum of target-groups. Variable and suitable for experiments of various kinds. Original languages can be: German and/or English, Chinese (incl. subtitles⁸), optionally: host country's language, overdubs (Russian, Spanish...?)

3. Details_?

A bit like on sea: The frame of action / setup

The taxi will be named, like a ship. Maybe three times (in Hamburg, Berlin and Venice?) That's for good luck. In this spirit also a muster roll exists on board of **MC Merci (GD)** ⁹

Muster-No.	Function	Character	Cast
CO07 ¹⁰	guide	taxidriver/pupil	Haggie (german/english)
MO01	chiefpurser	passenger/teacher	NN (chinese/german?/english)
SO01	pilot	guardian angel/hitchhiker	alternating (host's language/english)

Guide and chiefpurser are actors. Additional passengers (PAX) according to the seize of the taxi.

The Team on shore: The taxi control room

- (patronage)
- director, editor, producer
- marketing and merchandising
- secretary (2 shifts) and support-network
- postproduction (Chinese Subtitles!)
- webmaster

Cruisemap / dispo

Attached: Possible raw schedule for an itinary during new year 2008/2009.

Daily schedules

Tight schedules that are "just even" realistic will be the key to success. Details depend on the way Merci.GD will develop, which broadcasts/formats will be realistic and appreciated and on many "bagatelles", e.g. the possible transfer rate on sat-dsl (daily time-need). It is very important to consider the growing time-delay. In the second half, after crossing the Chinese border, the crew is seven hours ahead of the control room. A couple of days for rehearsals should be provided to start over as efficient as possible. A lot can be shot during the drives, using fixed on board cams („big brother on the road“).

⁸ In Chinese TV you will find subtitles most of the time anyway, as you will find a lot of very different spoken dialects and languages in different parts of China, all using the same scripture.

⁹ MC (here): Motorized Car. Merci: Loving shortcut of „Mercedes“, one of the smuggler-sisters in the famous opera „Carmen“ by George Bizet, nominated patron of the Merci-missions. GD is the port of registry: Schwäbisch Gmünd. Formerly GD was the license number of this beautiful small town in the south of Germany, now it is AA, which sounds like the French pronunciation of Hamburg's number HH. The TLD .gd originally belongs the state of Grenada, an island 200 km north of Venezuela.

¹⁰ C means captain, not crew! This number normally exist (if at all) only as CO01, of course. Considerably M means member of crew (orig. German: "Mannschaft") - and not master. S signifies staff, a status between passenger and crew, like guest-artists or masseurs. Organisation on board is clear and strict and will cope with all challenges of the mission: The guide also has the function of a safety-officer (drills!), moreover he covers the chef de cuisine, bosun and carpenter. The chiefpurser is also in charge as security-officer (tank cover, wheel caps!). Additionally she covers the hotel-manager, being her own boss in this sense, subordinated directly to the company in almost every sense. Absolutely on the same hierarchic level as the guide, apart from the tradition that on board the captain has the final say (if he wants). This structure of competences will probably provide no perfect harmony between the two travellers, which is intended, looking forward to an entertaining trip. Steering will be done by turns, that's for sure. Still unclear: physician, radio-officer, laundry-manager.

4. Factoring_?

Patrons, fans, users, advertisement, merchandising, brand-cooperations, works on demand...

Parallely / supplementary: Arthouse-Movie? (additional crews on site/outdoors!?)

Production und marketing at the same time in/from China and Europe (chiefpurser!)

- labour (3 on tour, min. 6 in „control room“)
- market entrance (marketing- and other initial costs)
- vessel (limited off road capability?) 14.000 km/3 month

Dazhong-taxi, Shanghai (VW Santana)

Large capacity-taxi, Hamburg (MB Vito)

- fuel (at 8 l /100km: ca. 1750 l)
- tires (2 spare)
- oil, inspections
- technical equipment: cameras, laptops, navi/mobiles, sat-DSL, supplies
- further equipment: clothes, shoes, ...
- visa, permissions
- compliments¹¹
- communication
- accommodation
- provisions
- expenses
- return flights

¹¹ That's how in some ports the gifts are called that simplify collaboration between pursers, harbour agents and local authorities. Sometimes cigarettes, sometimes office supplies, sometimes money, sometimes a "better don't". Can be found out.

5. Next_?

Hamburg...

...Shanghai

Next sequel: Los Angeles? Hawaii? Panama? Sydney? Or back through Sibiria?

6. Objections_?

Most important, after finding a professional production and marketing company, will be to find the perfect chiefpurser for the mission. Adventurous, movie-enthusiastic, open and self conscious. A good driver, technology enthusiast. German is only one option – “Chinesisch unterwegs” could be “Chinese on tour” just as well. Or in both cases 出车 汉语¹²

It is considerable to exchange the crewmembers at some of the stages (airports) if e.g. someone gets sick during the journey.

A team for the control room can be found.

And fans. There's plenty of time.

¹² 出车 汉语 Hànyǔ chūchē: Spoken Chinese, on tour with a coach.
